Solan Abate

Software Engineering Student & Full-Stack Developer

Addis Ababa, Ethiopia | solanabate9@gmail.com | github.com/DevSolan1 | linkedin.com/in/solan-abate-0680b33a2

Summary

Software Engineering student and aspiring full-stack developer who builds web and mobile applications, from database design to polished interfaces, with practice in Java, JavaScript, Python and C++. Enjoys solving problems, learning new tools and building useful applications. Seeking an internship or entry-level opportunity in software development.

Education

BSc in Software Engineering | Dembi Dollo University | 2023 to 2028

Relevant coursework: Data Structures and Algorithms, Database Systems, Object-Oriented Programming, Web and Mobile Application Development, Software Architecture and Design, Software Testing and Quality Assurance, Requirements Engineering, Software Project Management, Networking, Machine Learning, Software Security, Distributed Systems.

Technical Skills

- **Languages:** Java, JavaScript, TypeScript, Python, C++
- **Frontend:** HTML, CSS, Tailwind CSS, React, Next.js
- **Mobile:** React Native
- **Backend:** Node.js, Django, Java client-server programming
- **Design:** Figma, Canva, Responsive design, Accessibility
- **Testing:** Jest, Postman, Manual testing, Browser DevTools
- **Deploy & Tools:** Git, GitHub, GitHub Pages, Render, Vercel, VS Code, Eclipse
- **Computer science:** Data structures and algorithms, Object-oriented programming, Database fundamentals, Software engineering principles

Projects

Complaint Management System | GitHub | Live demo

- Django 5 web app for submitting, tracking and resolving customer complaints, with role-based access for Customers, Agents and Managers
- Reference numbers, status lifecycle with history, threaded comments with staff-only notes, email notifications, filters and role dashboards
- Read-only REST API
- Technologies: Python, Django, Django REST Framework, Bootstrap, SQLite, PostgreSQL

Diabetes Prediction System | GitHub | Live demo

- Machine learning web app that predicts the likelihood of diabetes from patient health data using a trained classification model
- Simple form for entering patient data with an instant prediction result
- Technologies: Python, Scikit-learn, Streamlit

Web-Based E-Learning Platform | GitHub

- Platform where students browse, enroll in and complete courses, teachers manage content, and administrators manage users, courses and payments
- Video-based learning, progress tracking, messaging, notifications, certificates and payment management
- Technologies: HTML, CSS, JavaScript, PHP, Bootstrap

Responsive Personal Portfolio | In progress

- Responsive, accessible portfolio site with light and dark themes and data-driven skills and projects, built to present my work to recruiters and collaborators
- Technologies: HTML, Tailwind CSS, JavaScript, Git, GitHub Pages
